CELJSKI SEJEM

OPPORTUNITY TO PROMOTE YOUR COMPANY AND MAKE NEW CONTACTS

Dear Business Partner,

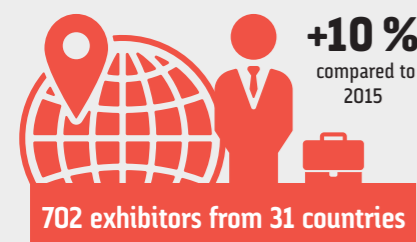

With the rapid increase of the number of visitors and exhibitors in the recent years, the biennial International Industry Fair in Celje has become the largest and most prominent fair in the fields of machine manufacturing and toolmaking, welding and cutting in SE Europe. It is a major regional fair, which is confirmed by the fact that over 60% of exhibitors are foreign companies from over 20 countries, and over 15% of visitors come from over 10 foreign countries.

This is why you are kindly invited to reserve your exhibition space to present your company. For everyone involved in these industries, the International Industry Fair is an outstanding opportunity to acquire customers from the entire SE Europe as quickly and effectively as possible, to present novelties, meet your existing customers and to compare your achievements with your competition. Don't miss this opportunity – you only get it every two years.

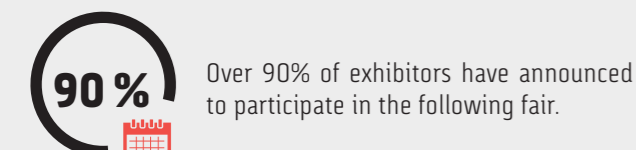

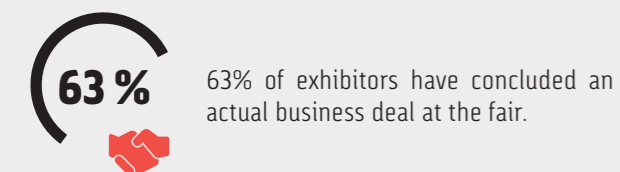

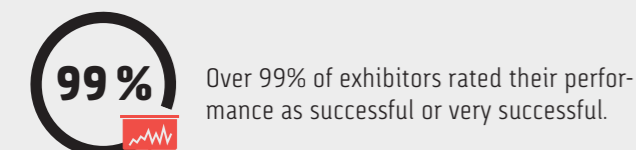

Robert Otorepec M. Sc.
Executive director

A place for sharing knowledge, discussions and new business partnerships

EXHIBITION PROGRAMME

FORMA TOOL – TOOLMAKING AND MACHINE MANUFACTURING

- Turning Machines Lathes & Turning centres
- Grinding machines
- Forming, cutting and abrasive machine tools
- Deburring & Edge Finishing
- Drilling & Tapping Machines
- Plastic injection molding, extrusion, blow molding, thermoforming and welding machines
- Other machine tools and machines
- Components, parts and accessories
- Industrial software and engineering
- Coolants and lubricants
- Micro Manufacturing
- Metrology, inspection and testing
- Quality assurance, gauging and inspecting
- Safety equipment and protection
- Plant engineering and maintenance
- Institutions, associations and publishers

WELDING AND CUTTING

- Welding, cutting and soldering machines
- Basic, additional and auxiliary welding and soldering consumables, materials and tools
- Safety equipment and protection
- Technical gases and storage equipment
- Certification, quality assurance and inspecting

MATERIALS AND COMPONENTS

- Thermoplastic granules, resins, coatings
- Raw materials & auxiliaries
- Advanced materials
- Semi-finished products
- Adhesives, epoxies & encapsulants

ADVANCED TECHNOLOGIES

- Industrial automation
- Industrial robots and tool handling technology
- Additive manufacturing and prototyping
- Design CAD/CAM software
- Laser and laser systems
- Reverse engineering
- Industrial labeling
- Product life cycle management software and solutions
